## July is National Minority Mental Health Awareness Month

National Minority Mental Health Awareness month is observed each July to bring awareness to the unique struggles that racial and ethnic minority communities face regarding mental health in this country. 41.8% of the U.S. population are people of color, yet racial and ethnic minorities are more likely to live with an untreated mental illness because of health disparities in our nation, along with stigma and fear of judgement surrounding therapy. There are therapists who are particularly attuned to this and people of color seeking mental health help could look for culturally aware therapists and search for keywords in providers' descriptions such as "culturally competent." No matter your circumstance, remember that you are not alone, you matter and you are loved.

ReVIDA Recovery® promotes safe and healthy communities by empowering individuals to reclaim their lives from opioid use disorder.

Morristown-Hamblen Hospital Foundation presents the Target for Healthcare Trap Shoot, an exciting event benefiting Morristown-Hamblen Healthcare System. Proceeds from this event allow the foundation to support continuing professional education, program development, and medical equipment needs at the hospital.

As the only hospital in the Lakeway area, Morristown-Hamblen Healthcare System provides excellent healthcare to residents throughout the hospital's eight-county service area and offers comprehensive cancer care, heart, lung, and vascular care, women's services, general surgery, orthopedics, emergency treatment, and critical care.

For more than 120 years, the hospital has embodied a culture of patient-centered care. This remains true today, as each employee commits to upholding our Pledge of Excellence to put patients first, strive for excellence, and make Covenant Health the first and best choice for healthcare needs in our community.

We thank you, our corporate sponsors and participants, for your generosity and support.
